LVM III DIY Kit– 1:100

About this item

- Geosynchronous Satellite Launch Vehicle | LVM III | Non Working Static Ready Model
- If your kids love to wonder about the mysteries of space and fantasise about discovering what the vast majority of this universe entails, then this DIY Model of ISRO's LVM 3 Rocket at 1:100 Scale is the best gift for them. This DIY model is made in flat pack form with pieces and parts that are used to assemble the rocket and get their rocket for their study desks! This rocket will send your little one on a creative, experiential, and immersive adventure.

Diorama	Scale	Size	Price
CHANDRAYAAN 3 Vikram Lander and Pragyaan Rover	1:35	16.5cm x 16.5cm x 14cm (LxBxH)	Rs. 6140/-

Vikram Lander with Door Open & Rover shown on Moon Surface

Features:

The Lander Model is shown with Solar panels, an altimeter, LHVC, and payloads such as RAMBHA, Chaste & ILSA and other parts as shown in Fig.

The Rover Model has Solar Panels, a Navigation Camera, wheel drive assembly Chassis, etc.

Material:

The lander is made of Brass, Stainless steel legs, a Golden acrylic Body, an HDF inside structure, Aluminium detailing parts, and 3D printed parts.

The Rover comprises Stainless Steel wheels, Golden acrylic, and 3D-printed parts.

Manufacturing:

All parts are carefully manufactured by a process such as machining, laser cutting, laser welding, laser marking, molding, CNC machining, and manually assembled to fine details,

LVM III – Launch Pad

About this item

- LVM III – Launch Pad Non-Working Static Ready Model
- If your school or kids love to wonder about the mysteries of space and fantasises about discovering what the vast majority of this universe entails, then this DIY model of the ISRO GSLV Rocket Launch Pad at Sriharikota. Satish Dhawan Space Centre (SDSC) SHAR, Sriharikota, the Spaceport of India, is responsible for providing Launch Base Infrastructure for the Indian Space Programme. This Centre has the facilities for solid propellant processing, static testing of solid motors, launch vehicle integration and launch operations, range operations comprising telemetry, tracking and command network and mission control centre. The Centre has two launch pads from where the rocket launching operations of PSLV and GSLV are carried out. The mandate for the centre is (i) to produce solid propellant boosters for the launch vehicle programmes of ISRO (ii) to provide the infrastructure for qualifying various subsystems and solid rocket motors and carrying out the necessary tests (iii) to provide launch base infrastructure for satellites and launch vehicles.

Vikas Engine Model

About this item

- Vikas Engine, Non-Working Static Ready Model
- The **Vikas** (from initials of **Vikram Ambalal Sarabhai**) Engine is a family of liquid-fuelled propulsion engines conceptualized and designed by ISRO's Liquid Propulsion Systems Lab division. The design was based on the licensed version of the Viking engine with the chemical pressurization system. The early production Vikas engines used some imported French components which were later replaced by domestically produced equivalents. It is used in the Polar Satellite Launch Vehicle (PSLV) and the Geosynchronous Satellite Launch Vehicle (GSLV) series of expendable launch vehicles for space launch use
